JAPANESE CRUISER IS SUNK

DEFENSE BOND PURCHASES OUTLINED

Government Treasury Representative Is Lions Club Speaker

The importance of the purchase of U. S. Defense Savings Bonds or Defense Stamps by every citizen was stressed in a talk Tuesday before Placerville Lions by H. Clay Gains, representing the Treasury Department.

Mr. Gains was in Placerville for a meeting earlier in the day with the Defense Bonds Sales Committee, recently formed, and was persuaded to speak before the Lions who rearranged their program to permit him to get away to keep an appointment early in the afternoon in Auburn.

The Lions, following his talk, authorized their directors to purchase Defense Bonds from the club's funds buying the type and amount of bonds that seemed most advisable.

Other club business included a report by Lion Thomas Maul that plans are being concluded for the student speaker's contest, which will probably be held in February; a report by Lion President Ben Larson on the fine progress being shown by the Boy Scout troop; and the announcement that the club will have a ladies night meeting at the Shakespeare club house on February 17th.

Lions Roy Strum, Swift Berry, James Dalzell and Arthur Mart are the committee in charge for this meeting, which will be the occasion for the visit of the District Governor.

Mr. Gains pointed out to the club that the people of the United States are faced with the necessity of paying for the war in one way.

\$3,700 Defense Bonds For City

Pay Increases Voted By Councilmen In Meeting Monday Night

Placerville city council, in an adjourned meeting Monday night, transferred \$3,700 from the water fund to the general fund and authorized City Clerk Harold W. Duden to invest the money in behalf of the city in ten \$500 maturity value Series F U. S. Defense Bonds.

F. D. indicated Tuesday morning that he would take steps during the day to make the purchase. The motion was put by Councilman Philip Frost, seconded by Councilman Howard Lewis and was unanimously carried.

The council voted an increase of five cents per hour for the city work crew and in another action authorized increases of ten dollars per month for the city police, the assistant clerk, the librarian and the superintendent of public works.

A poll vote on this last question showed Councilmen Joseph Beach, A. H. Greeley and Frost voting "Aye." Mayor Charles Molinari opposed the proposition and Councilman Howard Lewis did not vote.

The council also had letters from various governmental agencies relative to requirements which should be met in the council's plans for purchasing two sirens to supplement the air raid warning system and Henry S. Lyon, chairman of the Council of Defense, who was in attendance at the meeting, offered the cooperation of the Defense Council in the matter.

Gasoline Price Ceiling To Meet Increases

WASHINGTON, (AP) — The government will set ceiling prices on petroleum products and gasoline at service stations and other retail outlets if prices rise above last Nov. 7 levels, price administrator Leon Henderson said today.

Mrs. Carl Tidd was among callers from the Springvale section on Tuesday.

Arm-Chair Industrial Strategists

By EDWARD H. COLLINS
 Associate Financial Editor

(Reprinted from The New York Herald-Tribune of Jan. 12, 1942.)

An extraordinary amount of nonsense has been produced recently by some of our political columnists concerning the so-called "Reuther Plan."

This is the proposal put forward last December by Walter Reuther, of the Congress of Industrial Organizations automobile workers, for pooling management, labor and machines in the motor industry and going into the mass production of war planes.

Looking back upon this proposal, and recalling the claims of its author that it would result in the output of "500 planes a day," these commentators have solemnly concluded that the present state of under-preparedness of the nation must be charged against the automobile industry for its failure to adopt the plan.

Here is a typical statement of the thesis from the pen of a typical columnist—representative of what may be best described, perhaps, as the "salon" school of industrial economics:

"Mr. Reuther made a proposal a year ago for the adaptation of the entire motor industry to the production of planes and tanks. His proposals were plain horse-sense that any layman could understand. But not the experts. They declared that it was impossible to make planes in automobile plants. So the automobile plants continued business and produced 4,000,000 automobiles last year, using up so much rubber that now the people who own cars can't buy tires. The plain fact is that the automobile workers were right and the industrialists wrong."

Now in the first place, the notion that Mr. Reuther, or the automobile workers, or any one else, has at any time enjoyed a monopoly on the idea of converting the automobile industry to war uses is utterly ridiculous. There never has been the slightest question about such conversion. The only question has been how it would be accomplished most practicably.

In the second place, it is not true that "industry" turned down the Reuther plan. Industry does not make defense production policies. It merely carries them out. The Army and Navy decide what is needed and the Office of Production Management decides how the needs can best be filled. That the automobile industry found itself in agreement with the Army and Navy and the O. P. M. on the merits of the Reuther plan is true, and it may also be true that some persons in the industry were opposed to that plan because they regarded it as an intrusion by labor on the management function. But the fact still remains that the plan was rejected as a matter of government defense policy, and for excellent reasons.

The first of these reasons is implicit in the absurd claim of Mr. Reuther that the industry could produce "500 planes a day." What does 500 planes a day mean? Well, in his victory program the President has unquestionably set his sights as high as he dared, and he is aiming at 45,000 combat airplanes this year and 100,000 next year, at the peak of production. In other words, although we are now in a fighting war, the President is asking only 125 planes a day this year and 275 a day next year — and this, it should be noted, is not from the automobile industry alone, but from the automobile and airplane industries combined.

The very fact that Mr. Reuther could have seriously proposed such a fantastic production program suggests that he has a very vague conception, indeed, of the difference between producing automobiles in peace time and airplanes in war time. Even in peace time the production problems are vastly different. Thus Paul McCrea, in an article in "The Nation's Business" for December quotes Arthur A. Schwartz, of Bell Aircraft Corporation, on the oft-heard question of "Why can't you make planes the same way you do automobiles?" Mr. Schwartz says:

"About the only similarities between an airplane and an automobile are that both are vehicles and both are propelled by gasoline engines. The automobile owes its popularity to two factors—reliability

and cheapness. In engineering the motor car these are of supreme importance. Secondary factors include operation, luxuriousness and performance. Weight is considered only after these are satisfied. In airplane design strength and lightness are supreme factors.

"If an automobile were built like an airplane, it would weigh about 300 pounds. It would cost like the devil, and it probably wouldn't be worth a damn."

These, however, with the production difficulties which they imply, are merely the peace-time differences. On top of them must be superimposed the need for extreme flexibility required under war-time conditions.

When an automobile company changes models it spends twelve months preparing the designs and tooling up. Under extreme pressure this might be cut down to six months. But then the problem is settled for an entire year. It is merely a question of turning out, say, 500,000 cars from a single "frozen" pattern.

But you can't "freeze" plane designs in the midst of a war—and especially an air war such as the present one. When the British brought out their "Spitfire" with its eight guns, every plane in the same category with less fire power became obsolete overnight. This is only one example of the changes that are in progress every week, every day and every hour. There have been revolutionary improvements of this sort since the war began, not only in fire power, but in range of operation, ceilings, armor, speed and in maneuverability. Each of these changes calls for changes in plane design and for retooling.

As to the conclusion that the shutting down of auto production now means that "the automobile workers were right and the industrialists were wrong," that is patently absurd. The abrupt shutting down of the motor industry followed inevitably as a result of the cutting off of the rubber supplies from the Far East and the result.

3rd In Forum Series Set

Current Influences Upon Consumer Goods Will Be Thursday Night Theme

Shortages, substitutes, scarcities, restrictions and supply of consumer goods and merchandise stocks will be the theme for the entire period of discussion at the Business Forum meeting next Thursday night. The background economics concerning the raw materials which go to make up our major products carried by the average retail store will be sketched in a practical way, so that employee and employer alike can determine for himself about the future of the various products in which he is especially interested.

"To know the accurate condition of the raw material situation," stated Frank Emery Cox, Regional Coordinator for the California State Department of Education Business Bureau, "enables one to predict for himself what shortages will prevail. To have this information makes it possible to guard against embarrassment when the acute shortage develops. To be forewarned now is to be fore-armed when the critical period comes. Our tire situation is typical. If we had made an analysis of the raw material situation far enough in advance individually many of us would be much better provided for today. The explanation of the rubber situation and what to expect will come in for full explanation at this meeting."

In addition such other critical products as tin, wool, cotton, leather, silk and its substitutes, chemicals, food, and many others will be discussed. Mr. Cox, who directs the meetings has as his official source of data such agencies as Office of Production Management, the Office of Price Administration, Supply and Priorities Board, and many other authoritative government agencies, as well as trade and research organizations. The meetings are pre-

(Continued on Page Three)

How the Yanks Sailed—in '18

With an American expeditionary force being rounded into shape for action "wherever they are needed," according to President Roosevelt's state-of-the-union speech, United States soldiers will soon be filling huge transports like this one. Here, American troops are shown aboard the troopship *Mt. Vernon* during the first world war. (Central Press)

SLIGER MINE LEADER IN GAIN FOR GOLD PRODUCTION IN '41

State's Output For Year Declines 3 Per Cent But California Continues To Lead Nation In Value Of Gold Produced, Survey Shows

SAN FRANCISCO—The quantity and value of gold recovered from California ores, old tailings, and gravels decreased in 1941 after an uninterrupted rise begun in 1930, according to the San Francisco office of the Bureau of Mines, United States Department of the Interior. Outputs of silver and copper also declined in both quantity and value, but those of lead and zinc, though small, were both above the 1940 levels.

Preliminary figures show gold production in 1941 as 1,411,800 fine ounces, silver 2,147,000 fine ounces, copper 7,819,000 pounds, lead 6,610,000 pounds, and zinc 780,000 pounds—valued in all at \$52,282,966. These figures compare with a production in 1940 of 1,455,671 ounces of gold, 2,359,776 ounces of silver, 12,876,000 pounds of copper, 3,544,000 pounds of lead, and 158,000 pounds of zinc—valued in all at \$54,268,690.

Despite a 3-per cent decrease in gold output in 1941 compared with 1940 California continued to be the leading gold-producing state. Comparison of the total production of the 25 leading gold producers in California in 1940 with preliminary figures for the same companies for 1941 shows an aggregate change of less than one-tenth of 1 per cent. It is clear, therefore, that the decline in California gold production was borne by the smaller producers. Evidence substantiating this deduction is furnished by custom mill operators, who report that the total monthly receipts from small operators late in 1941 were, in most instances, far below 1940 averages. Rising wages, the migration of miners to defense jobs, rising costs of supplies and materials and difficulties in obtaining them, higher taxes, and a fixed price for gold (principal metal produced in California) were all factors likely to continue their adverse effect on California gold mining.

The Grass Valley-Nevada City district in Nevada County continued in 1941 to be the center of the gold-mining industry in California. The Idaho Maryland Mines Corporation, working the Idaho-Maryland-Brunswick group in the Grass Valley-Nevada City district, ranked first among California gold producers for the third successive year. Its neighbor, the Empire Star Co., Ltd., (Newmont affiliate), operator of the Empire, Pennsylvania, North Star, and Murchie mines in the Grass Valley-Nevada City district, the Zeibright mine in Bear Valley, near Emigrant Gap, and the Pennsylvania mine at Browns Valley in Yuba County, remained in second place.

In El Dorado, Amador, Calaveras,

Supervisor Cyril Heusner was in town Tuesday from Shingle and confessed, under questioning, that he and Mrs. Heusner became grandparents on January 7th.

They attained this station by virtue of the birth, on that date of a daughter, Mary Jane, to Mr. and Mrs. Ray Martin, of Sacramento. Mrs. Martin is the former Marian Heusner.

"Grandpa!" said Supervisor Heusner, adding, "but I don't feel a day older."

Income Tax Facts

The Deputy Collector of Internal Revenue will be at: Placerville postoffice (office in the basement) on Monday and Tuesday, January 26 and 27; Monday and Tuesday, February 2 and 3; Wednesday and Thursday, February 11 and 12; and from March 2 to March 7, both dates inclusive.

Al Tahoe postoffice on February 6th;

Camino postoffice on February 9th;

Georgetown postoffice on February 10th.

NO. 6 SIMPLIFIED RETURNS FOR OPTIONAL TAX

The Revenue Act of 1941 provides a simplified method of computing income tax in the case of individuals whose gross income is derived wholly from salary, wages, or other compensation for personal services, dividends, interest, rent, annuities, royalties, and does not exceed \$3,000. A new Form 1040A has been provided for taxpayers who are entitled to and elect to use such method. A table on the reverse side of the form shows the amount of tax on increasing amounts of gross income after the proper allowance of \$400 for each dependent, if any.

The tax under the simplified method is the same for each \$25 block of gross income and the taxpayer need only ascertain in which block his gross income (less allowance for dependents) falls to determine his tax. A flat reduction of 10 per cent has been made in arriving at the amount of tax shown in the table for deductions such as charitable contributions and taxes paid, so that the taxpayer who uses this method does not list these but gets an automatic deduction of 10 per cent.

Under the simplified method the

Ted Atwood Advances In Rating In Navy

Ted Atwood, son of Mrs. Marion Atwood, has recently received an advancement in rating in the Navy and now is a "Lieutenant, Junior Grade."

Mr. Atwood, by reason of his training in connection with his college course, was commissioned an Ensign upon his graduation at the University of California several years ago and was enrolled as such in the Naval Reserve.

He continued his interest in the work following his graduation from college and, with the onset of the emergency, was called to active duty in that rating.

His recent advancement to be a Lieutenant, Junior Grade, is a reflection of his interest, application and success in active duty in the Navy.

PHILIPPINES DEFENSE ON 2 FRONTS

Churchill Is Confident; MacArthur Reveals New Action North Of Davao

LONDON, (AP) — Growing confidence in the United Nations stand against Japan in the Far East was expressed in the House of Commons today by Prime Minister Winston Churchill.

The Prime Minister spoke briefly as he prepared to face the house later for a three-day full dress war debate and, if challenged, to demand a formal vote of confidence.

By UNITED PRESS

Japanese held the offensive against the United Nations in the Far East today but took stiff counter-punches.

From the Philippines, Gen. Douglas MacArthur reported that the enemy again was driving behind aerial attacks at the center of the Bataan Peninsula line, but he said three planes were shot down and that U. S. Army bombers sank an enemy cruiser and fired a tanker off the southern island of Jolo.

Philippine troops also were fighting the Japanese invaders of Mindanao Island about 35 miles north of the big port of Davao, which the enemy sought to use as a base for invasion of the East Indies.

On the Malaya peninsula, the British reported increasing enemy attacks on a front south of the Muhr river and probably 75 to 90 miles north of Singapore, but Allied counter-thrusts and intensified aerial attacks were taking a heavy toll for invader gains.

Singapore again was raided by an estimated 50 enemy planes and some damage to military establishments was acknowledged.

United States bombers shot down nine Japanese fighters in heavy raids on the enemy at Celebes Island in the Dutch East Indies and on Sungei Patania airdrome in the Malaya sector. Two American craft are missing.

Dutch bombers struck at the Japanese in Kuching, the capital of Sarawak on north Borneo, starting a number of large fires, while the enemy again raided Sabang, on north Celebes, and Siebolga, on western

C. of C. Dinner On Jan. 28th

R. R. Gros Guest Speaker; Installation, Reports Of Committees On Program

The annual dinner meeting of the membership and installation of officers for the new year of the El Dorado County Chamber of Commerce will be held at seven o'clock on Wednesday evening, January 28, at Hotel Raffles.

The time of the occasion is a change from an earlier announcement which had set Jan. 29th as the date.

Arrangements for the evening were announced Tuesday by Secretary Wallace M. Ripley following a meeting with Swift Berry and E. Ogden Hook, who had been designated by the directors as the committee in charge.

Guest speaker for the evening will be Robert R. Gros, of the public relations department of the Pacific Gas & Electric Company, a forceful and entertaining speaker, according to reports by those who have had the good fortune to hear him address meetings in other sections of the state.

The business of the evening will see John A. Raffetto, Jr., succeed Roy G. Strum as president of the chamber, and will hear reports from several of the major committees of the organization including Publicity, Swift Berry, chairman; Highways, John A. Raffetto, chairman; Conservation, John Winkelman, chairman; Budget, Lloyd Raffetto, chairman; and Recreation, Edwin F. Smith, chairman.

The meeting will be open to members and their wives or other friends.

WHAT'S WHAT AT A GLANCE
WASHINGTON - WORLD

By CHARLES P. STEWART
Central Press Columnist

Winston Churchill

THAT OUR side won the last war but "lost the peace" is a remark to be heard, generally several times, in the course of every discussion of the kind of terms it'll be the end of our present conflict. Presumably we and the rest of the democracies, including plus Russia, will dictate 'em, and the Axis bunch, supposedly with all their 'fuhrers, Tokyo militar-

ists, duces and sympathetic caudillos liquidated, will have to acquiesce, whether they like our conditions or not. It won't be to our own interest, though, to lose another peace. So what we'll need to dictate will be some form of one that'll stick.

There are pretty sure to be differences of opinion on that subject. One school of thought is to the effect that Woodrow Wilson had the right idea, with his League of Nations plan, but that we Americans queered the whole thing by refusing to go into the league. Argueurs along this line severely pan the congressional isolationists of that period, who voted against Yankee participation.

Having been grown up and a listener-in on the debate, while it was progressing, I can't but feel that the realists made out a fairly good case. The league, as outlined by Woodrow, was to settle international disputes peacefully, if possible, but, if some single power or group of countries refused to accept a league award and took the warpath, then the league aggregation were to be bound, jointly, to lick the balky outfit into submission. In other words, if a war did start, every league nation automatically was to be in on it. The anti-league statesmen didn't like to commit the United States, light unseen, to such a bargain.

Another League?

Today a post-war league or something similar to it is a scheme that has its advocates. Another school of thinkers maintains that a post-war league, inclusive of all nationalities, shouldn't be our objective—that the democracies' job is to lick the totalitar-

ian-dominated peoples so flat that they'll completely disintegrate as fighting units, and won't be able to reassemble 'emself "in at least 1,000 years," as I've heard it expressed. According to these reasoners, the Allies "lost the peace" in 1918 not because their terms weren't too hard, but because they weren't nearly hard enough.

Winston Churchill's notion appears to be not so much a League of ALL Nations, as a present and post-war Yankee-British alliance. He has no objection, seemingly, to taking in the entire collection of democracies (the Americas generally, the Chinese and all the German-occupied little countries, as fast as they're available), but a permanent U. S.-British hookup is what he emphasizes, and he hasn't intimated that he favors a league inclusive of the Axis alignment, even after the Axis is totally squashed. I don't see how he can omit Russia, though.

The proposition's advanced that Germans and Italians are all right—that they aren't the ones who are to blame, but that Adolf Hitler and the now despised Benito Mussolini are the miscreants. The answer is, however, that the masses of 'em fell for Adolf and Benito and that it never will be safe to trust 'em again, or they'll fall for future Adolfs and Benitos, though the current incumbents may be blotted out, unless they're put forever out of business AS masses, of their two particular breeds.

Japan Is Different

The Japs are a meaner problem yet. Finishing off Adolf and Benito MIGHT turn the democratic trick as to the Germans and Italians. That pair are only a couple of individuals, but the Jap militarists are a good-sized class.

So what about the peace conference, when it comes? Some of the conferees will want an all-around World League. Some will want a league with only Japan left out. Some will want Russia left out, too, if it stays Soviet. Some will want an exclusively democratic league—no ex-Axis powers entitled to a voice in it. Winston Churchill will want a Yankee-British alliance, probably without prejudice to the smaller democracies' representation in it. Some will want Germany, Japan and Italy smashed up for all time. Some will favor admitting 'em, if they promise to reform.

Those conferees will be kept guessing for quite awhile, as they try to hit on a peace that the victors can't conceivably lose.

FOR VICTORY

Talbot cartoon courtesy of Washington News.

GLAMOROUS SWEETS

I want to tell you about some truly glamorous-looking Christmas boxes I saw being packed the other day. They were destined for boys in the army and navy training camps. And they seemed to carry the spirit of Christmas right with them. As one girl who watched the packing said, "Each box has as much Christmas spirit as a Christmas tree."

Like Christmas Tree Ornaments

Big round tin boxes were being filled with glistening little red and green and gold packages that did make you think of the glistening ornaments on Christmas trees. There was a sprig of holly on top with a greeting card tied to it.

Colored cellophane had been cut into squares, a cookie or piece of candy placed in the center—then the four corners of the cellophane brought up around it and twisted to hold them together.

Here are recipes for some of the confections which the girls had made to wrap in these colorful little packages.

TINGALINGS
1/2 lb. sweet chocolate (either milk or baking chocolate)
2 oz. (2 sq.) bitter chocolate

Melt sweet chocolate and bitter chocolate together over hot water. Stir in the wheat flakes and salted peanuts gently being careful not to crush the flakes, but also being sure that all peanuts and flakes are chocolate covered.

Drop by tablespoons onto waxed paper. Place in refrigerator and leave until chocolate is set, dry and hard—about 2 hours.

This makes 25 large clusters.

COCONUT PENOCHE
3 cups brown sugar
3 cups canned or shredded cocoa
1 cup large salted peanuts
1/2 cup wheat flakes (whole wheat, ready-to-eat breakfast cereal)
2 tsp. vanilla
1/2 tsp. salt

Mix together in a saucepan the sugar, coconut and milk. Place over low heat and stir constantly until sugar is dissolved. Bring to boiling point and boil until it forms a soft ball when dropped into cold water, 234° F. The mixture becomes very thick and must be stirred almost constantly toward the end of the cooking. Take from heat and stir in the vanilla and salt. Place saucepan of candy in a basin of cold water renewing the water as it becomes warm. When cool beat until creamy and spread on a slightly greased 8-inch square pan. It makes about 30 pieces of candy.

If milk is not very rich, a tablespoon of butter may be added when the candy is removed from the heat.

ENGLISH TOFFEE
1 cup sugar
1 cup butter (1/2 lb.)
1 cup coarsely cut almonds (1/4 lb.), blanched and toasted

Cook sugar and butter together in a sauce pan over a very low heat stirring constantly to prevent sticking and the formation of crystals on sides of pan. Continue cooking slowly until mixture thickens and becomes the consistency of heavy gravy and light brown in color (20 to 25 minutes).

Remove from heat, stir in the almonds and pour into a buttered pan. Set in a cool place. When hard, remove from pan and break into pieces with a knife.

Place nuts in an ungreased shallow pan in a warm oven for a few minutes until delicately browned. This greatly improves the flavor.

Celebrate Child's Successes
To Make Doing Right Pleasant

By GARRY CLEVELAND MYERS, Ph.D.
MOTHER NATURE makes us chary of praise and over-generous with blame. We do not have to look for things to punish children for; our nervous system does it for us. But to approve effectively, and as often as we should, calls for intellectual effort; and because we are so lazy mentally, we rarely celebrate successes in the child.

Pain prevents; what once was painful tends to be avoided. Pleasure promotes; what once was pleasant tends to be repeated. By means of pain systematically applied, we easily can train the little child to avoid stepping off the curb into the street, turning on the gas jet, or playing with fire. Foolishly most parents try also, by means of punishment, to make the little child choose to come in from play, pick up his blocks, or go happily to bed. Pain applied for such purposes becomes torture, and as a rule fails to bring the results expected.

How absurd and contradictory it is to employ pain to make any activity attractive! There is no better way to make children avoid saying "please" than to scold and punish them for not saying "please"; no better way to make them quarrel than to compel them to kiss each other after quarreling; no better way to make them shy than by compelling them to shake hands with guests.

Make pleasant the thing you

Defense Bonds
Plan Reviewed

(Continued from Page One)

or another and that it is believed that a very great majority of the people will prefer that the war cost be defrayed by investment in Defense Bonds, rather than by taxation.

He explained the various types of bonds which may be purchased and pointed out that in the case of Defense Stamps, it is to the advantage of stamp purchasers to convert the stamps into bonds as rapidly as possible, since the stamps pay no interest and the bonds do, the interest dating from the time of issuance of the bond.

Mr. Gains drove home the point that the purchase of bonds is a national activity by stating that he recently had seen a cartoon which illustrated the point. The drawing, he said, portrayed a man looking into a mirror, and the reflection he saw was of Uncle Sam.

"Many people look upon government as some agency which is far away; but this cartoon," he said, "gave a very excellent illustration that the government is not something far away, but that it is you, and you, and me."

A question and answer period in which members of the club showed an active interest concluded his talk.

THE LEGISLATURE CONTINUES
IN SESSION AT
SACRAMENTO

SACRAMENTO, (AP)—The California legislature met today to attempt to salvage state guard legislation and to unravel one of the queerest legal tangles in many years.

The assembly refused for the third time to pass a restricted \$8,000,000 guard bill late yesterday by a vote of 45 to 25, nine short of the required two-thirds majority, and thus killed the bill.

The assembly coalition majority then voted to recess until Dec. 7, 1942, and many legislators even started home. The senate, however, unanimously rejected the recess resolution and declared it was opposed to leaving the capital until guard funds were voted.

Under the state constitution, one house cannot recess for more than three days without the consent of the other. The remaining assemblymen may successfully force the sergeant-at-arms to use his police powers to return the absentee members.

DAYLIGHT SAVING TIME
STARTS ON MONDAY
FEBRUARY 9TH

WASHINGTON, (AP)—President Roosevelt today signed legislation placing the entire nation on daylight saving time, effective at 2 a. m. Monday, Feb. 9.

Dr. Galt Atwood was here from the Bay District during the week-end visiting his mother, Mrs. Marion Atwood, and other friends.

NELSON SAID TO CONTEMPLATE
CREATION OF MAN-POWER
AGENCY FOR LABOR

WASHINGTON, (AP)—New production generalissimo Donald M. Nelson and his new war production board hold their first meeting today to discuss Nelson's reorganization plans which may include creation of an agency to coordinate labor supply and training with the new war effort.

An announcement of the production reorganization plans may be made by Nelson after the meeting.

It was reported in reliable quarters that he plans to create an overall man power agency headed by a labor "czar" who would have powers comparable to those given the British labor ministry under Ernest Bevin.

Carole Lombard, Mother
To Be Buried Together

LAS VEGAS, Nev., (AP)—Clark Gable planned to return to Hollywood with the crushed body of his wife, Carole Lombard, today after identification of the body of the film actress' mother.

Gable's film studio associates said a double funeral would be held tomorrow or Thursday for Miss Lombard and her mother, Mrs. Elizabeth Peters, both victims of an airplane crash in which 22 were killed.

STATE BASEBALL LEAGUE
OPENS APRIL 24
WITH 6 CLUBS

STOCKTON, (AP)—The California State Baseball League, a class C loop, will open its season April 24 with six teams from northern and central California competing. It was announced today following a meeting of club and league officials.

The franchise of the Anaheim

Aces has been transferred to San Jose while Riverside and San Bernardino have dropped out of the loop. This tends to make the circuit more compact and cut down traveling expenses, as well as bringing a larger population (in San Jose) from which to draw.

43-More devoted of adulteration
44-Compensation for obtaining of loan
45-Strong liquor
46-Play on words
47-Tainted
48-Gloomily ill-humored
49-Malay dagger
50-Small house
51-Reason for action
52-Cleared of water
53-Agreement
54-Separation
55-Butte
56-State positively
57-Consolidated portion of milk
58-Suffix function
59-Part of foot

MAKING AMERICA STRONG

INDUSTRIAL DISCOVERY 'PEPS UP' PLANE SUPER FUEL 25%

INDUSTRIAL RESEARCH IN CHEMICAL FIELD LEADS TO MAJOR IMPROVEMENT IN HIGH-TEST AVIATION GASOLINE

BY USING 4 CUBIC CENTIMETERS OF LEAD TO A GALLON OF GASOLINE INSTEAD OF 3, THE EFFICIENCY OF THIS SUPER GAS HAS BEEN INCREASED 25 PERCENT

NATIONAL ASSOCIATION OF MANUFACTURERS

Super aviation motor fuels of 100 octane quality are being produced by American refiners at 7½ times the rate of consumption of all grades of aviation fuels only three years ago, and plans to triple even this huge capacity within the next 12 to 18 months are moving rapidly ahead. Construction already has started or contracts have been let for 25 new plants, with the highest priority ratings, and dozens of other plants are being blue-printed, the American Petroleum Institute reports.

Present capacity to manufacture 100-octane motor fuel is about 2-100,000 gallons a day. Only a few weeks ago the capacity was 1,800,000 gallons a day, but the decision of government purchasers to allow the use of 4 cc rather than 3cc of tetraethyl lead in 100 octane fuel not only increased efficiency but also jumped up the capacity more than 15 per cent.

These capacities are in addition to the continuing manufacture of large quantities of slightly lower-grade aviation motor fuels of 85 and 91 octane rating. Until three years ago these grades made up virtually the entire supply of aviation fuel. The super 100-octane fuel was still in the laboratory seven years ago, and even moderate-scale commercial production did not begin until three years ago.

In that year, 1938, the total consumption of all grades of aviation fuel in the United States, by government, airlines, and private fliers, amounted to only 100,000,000 gallons, or about 275,000 gallons a day. In three years the petroleum industry has built new plants capable of making 2,100,000 gallons of 100-octane fuel alone every day and is straining to add even more in the next 12 months so that by January 1, 1943, capacity will be close to 5,000,000 gallons a day.

Government plans changed so rapidly and unforeseen new demands appeared so suddenly during 1941, that the 100-octane capacity which looked ample, with nor-

mal expansion, early in the year, was found by the end of the summer to be deficient for the projected future consumption. It is believed that no actual shortages have yet appeared in the supply of this vital fuel. However, estimates of the 1942 and 1943 requirements for the United States and friendly powers are being revised upwards so rapidly and so drastically that the break-neck construction of the huge additional capacity is necessary to avoid future deficiencies.

Various expedients to increase production without new plants, such as the increase in the proportion of tetraethyl lead, are being used. An encouraging sign of the resourcefulness of American refinery research workers was the recent announcement of a highly-efficient new process which will tremendously increase the efficiency and production of 100-octane fuel. The process was immediately released by the inventing oil company for use by all refiners, but its effect cannot be felt immediately because new plants must be built.

PONY EXPRESS LEAGUE

The series tonight sends the Coca Colas, in third place, against the fourth place Lions; the league leading Davenport against the bottom place Gene Morrisons, and the Round Tenters, who share the place, against the second place St. Patricks.

SATURDAY SPECIAL

Saturday night, Pittsburg comes to Placerville with two teams, gals and guys. It'll be the first bow of the 1942 year for the county team as they meet the Pittsburgers, and also the first bow of the year for the women's league team as they roll out the ball against the Pitt-y femmes.

HANGTOWN LEAGUE

The Collins Studebakers had the old hill holder working Monday night and a 21-pin handicap failed to do the Bank of America five any good. Collins took three. The score:

Bank of America			
Paul Smith	151	141	139-431
Don Brink	112	109	147-428

In Russia and Libya, the Allied forces failed to make any important new gains. The Red army counter-offensive still seemed to be on the verge of important new successes but for more than a week the Rus-

New California Roads Promote Safety

AND AID IN NATIONAL DEFENSE MOVEMENTS

Above—Finished highway on ocean shore south of San Francisco eliminates 214 curves and gives accessibility to many beaches.

At Right—Eight-lane Cahuenga Pass Parkway with side drives—an outstanding piece of construction that gives free access to and from Hollywood and Los Angeles, is inspected by C. H. Wartman of General Petroleum (standing on bridge).

Below—New overpass on Redwood highway (101), through San Rafael, relieves one of San Francisco Bay's worst bottlenecks.

—Photos courtesy Mobilgas Marketers.

The year 1941 went down in California history as a period of outstanding achievement in the widening and straightening of existing highways, reduction of mountain grades and building of new roads and bridges by the California Division of Highways and Public Works, in co-operation with many cities and counties.

According to information reaching A. J. Donnelly, Northern California resident manager for the marketers of Mobilgas, approximately \$40,000,000 was expended last year in additional divided-highway strips on routes 99 and 101 in many counties, and new roads in various areas.

The highway improvements, several more of

which are now in progress, are freeing motor traffic in many former bottleneck areas and aiding national defense by facilitating troop movements. Herewith are pictures showing just a few of the many projects which are making California more famous than ever for good, safe roads and record motor travel.

Above—Widening and straightening three miles of Highway 99 through Cajon Pass near Grapevine, south of Bakersfield, frees congestion on heavily traveled San Joaquin Valley route.

At Left—Splendid new bridge across Sacramento River at Antler, near Redding, is important unit in the realignment of Highway 99, a major project of the past year.

Jap Cruiser Tanker Sunk

(Continued from Page One)

Sumatra.

The general effect of these operations was a stiffening of Allied resistance so far as dispatches disclosed developments along scattered fighting fronts in the Far East but all dispatches emphasized that there was an ever-increasing need for reinforcements, especially airplanes to oppose Japanese blows aimed at many sectors in an effort to diffuse Allied strength.

On other fronts there was little change. The shelling and torpedoing of a fourth tanker, the Malay, off the coast of the United States, with loss of one life and four missing, seemed to confirm that a pack of long-distance submarines had been sent to the New York area in an effort to strike at any American troop transports that attempt to sail eastward.

In Russia and Libya, the Allied forces failed to make any important new gains. The Red army counter-offensive still seemed to be on the verge of important new successes but for more than a week the Rus-

sians have not officially reported any major advances and the bitter struggles now in progress against the Germans at such key points as Moshaisk, Orel and Kharkov indicated that the Axis defense lines were proving hard to break.

13 DEAD, 28 HURT AND 5 MORE MISSING IN APARTMENT HOUSE FIRE

LYNN, Mass., (UP)—Fire, believed caused by a discarded cigaret, swept a downtown apartment house today, fatally burning 13 persons and injuring 28 others. Five other persons listed as missing presumably were burned in the debris.

Triplets Hired Quickly
SIDNEY, O., (UP)—The Seger triplets, Carl, Henry and Frederick, 18 years old, applied at the Sidney employment office for jobs in a defense plant. They were hired immediately as plater helpers.

BRIDGE GETS BIG TOP REDDING, (UP)—The frequent, torrential rains of winter have caused the contractor of a big bridge project near here to order a tarpaulin 300 feet long and 50 feet wide at a cost of \$20,000 so that concrete work will not be delayed.

sent through the joint facilities of the El Dorado County High School and the California State Department of Education Business Bureau.

The meeting this week will be the third in the series of six and will start at 7:30. It will be held in the High School Library. There is no fee or cost attached with attendance. All business people of the community are urged to make a special effort to attend to obtain this up-to-the-minute important information from such an authentic source.

Las Vegas Plane Crash Inquiry Opens Friday

WASHINGTON, (UP)—The Civil aeronautics board said today a public hearing would be held Friday at Las Vegas, Nev., to determine the cause of the Transcontinental & Western Air Lines plane crash which killed Carole Lombard and 21 others Jan. 16. The hearing will be held at the Las Vegas post office and will be presided over by Robert W. Crisp, a CAB examiner.

Rice Baked With Cheese

By BETSY NEWMAN

I'M GIVING you a very simple and economical menu today, as it is just before another feast day. Baked Rice and Cheese is a dish that you should keep in your repertoire, so to speak, for lunch or supper.

Today's Menu
Baked Rice and Cheese
Scalloped Tomatoes
Apple, Cabbage and Celery Salad
Baked Orange Pudding
Tea or Coffee

Baked Rice and Cheese
3 cups cooked rice
¼ tsp. salt
1 cup milk
2 cups cheese

Put a layer of cooked rice in greased baking dish, cover with layer of grated cheese, season with salt and cayenne. Continue adding layers until dish is almost full. Add enough milk to come half way to the top of rice, cover with crumbs, dot with butter, and bake in moderate oven until crumbs are brown. Use temperature of 350° F. for 30 minutes. Serves 6.

Baked Orange Pudding
¼ cup sugar
3 tbsps. bread crumbs
1 cup milk
Beat egg thoroughly and add orange and sugar; scald milk and pour over crumbs; add first mixture and, when well mixed, pour into baking dish and bake until set like custard. Serve cold. Serves 2 or 3.

Sweet Potatoes

Recipe by: Mary Lee Taylor, Jan. 8

1½ tablespoons melted butter
½ cup light brown sugar, lightly packed
15 drained apricot halves, canned

2½ cups drained, mashed sweet potatoes (No. 2½ can)
1 beaten egg
¼ cup Pet Milk
1 teaspoon nutmeg

Turn on oven and set at moderately slow (350° F.). Grease a ring mold holding about 5 cups. Put melted butter in bottom of greased mold. Sprinkle brown sugar over melted butter. Put apricot halves, cut-side down, on top of brown sugar. Let stand while preparing the following: Mix together thoroughly mashed sweet potatoes, beaten egg, milk, salt and nutmeg. Put potato mixture in prepared mold. Bake about 40 minutes, or until firm. Remove from oven, loosen edges with knife and let stand about 5 minutes before turning out. Fill center with Creamed Peas (See below). Serves 6.

Creamed Peas

No. 2 can peas
1½ tablespoons butter or other shortening
3 tablespoons flour

½ teaspoon salt
½ teaspoon pepper
¾ cup liquid off peas or water
¾ cup Pet Milk

Drain and save liquid from peas. Melt butter in saucepan. Blend in flour, salt and pepper. Stir in liquid off peas. Boil 2 minutes, stirring constantly. Stir in milk. Add drained peas and heat thoroughly, but do not boil. Serve at once in center of Apricot Sweet Potatoes.

A MIRACLE OF ENGINEERING

and you'll agree when you see it—for this new and completely automatic oil burner outperforms even its maker's expectations for economy and dependability and of course, it's a

Income Tax Facts

(Continued from Page One)

status of a person on the last day of the taxable year is the governing factor in determining the exemption level (\$750 for single persons and married persons not living with husband or wife, and \$1,500 for married persons living together) as well as the credit for dependents.

A husband and wife living together on the last day of the taxable year may file separate returns on Form 1040A if the gross income of each is from the prescribed sources and does not exceed \$3,000, or they may file a single joint return on that form if their combined income is from the prescribed sources and does not exceed \$3,000. If they file a separate return the tax liability of each under the simplified method is the tax imposed upon a single person. If husband and wife file separate returns and only one elects to make a return on Form 1040A, the tax liability of the one so electing is the tax imposed upon a single person. If they file a single joint return, or if only one spouse makes a return because the other spouse has no gross income, the tax liability is the tax imposed upon a married person.

The use of the simplified method is optional with the taxpayer, but once an election has been made for any year, it is irrevocable for that year. If a taxpayer files a return under the simplified method for the taxable year, he may not thereafter file a return under the general provisions of the law for that year. Conversely, if he files a return under the general provisions for any taxable year, he may not thereafter file a return under the simplified method for that year. However, a new election is allowed for each succeeding taxable year.

Blade Imbedded 27 Years
DRUMRIGHT, Okla., (UP)—Chas. Carter, 49, Sac and Fox Indian, came to a Drumright physician with a sore spot under his right arm. The physician probed and pulled out the end of a knife blade. Carter recalled that 27 years ago he had a fight with a man who slashed him with a knife.

Subject Love, Says Soldier
CAMP BARKELEY, Tex. (UP)—Military routine became such a habit with Supply Sergeant Kreth White that he slipped into the military style for official correspondence when he wrote to his girl. The letter started: "Subject—Love."

America's Air Guardians Ready for the Enemy

Pilots of a U. S. Army pursuit plane squadron (top) are shown rushing to their ships during a drill at a strategic airfield on the Atlantic coast. Bottom left, they relax in their quarters. Bottom right, the pilots crowd through the door as they dash for their ships to answer an aerial alarm.

"THE RAJAH" ELECTED TO BASEBALL HALL OF FAME

NEW YORK, (UP)—Rogers Hornsby, generally regarded as the greatest right-handed hitter in baseball annals, has been elected to the baseball hall of fame by the Baseball Writers' Association of America, Bill Brandt, head of the National League service bureau, announced today.

Of 233 ballots cast by the baseball writers, Hornsby received 182, seven more than the 75 per cent required for election.

FRANCES RUUD RESIGNS AS FINANCIAL SECRETARY OF LEONA REBEKAHS

The meeting of Leona Rebekah Lodge No. 30 at their regular meeting Monday night received with regret the resignation of Mrs. Frances Ruud, their financial secretary. Mrs. Ruud explained she is compelled to resign by reason of her plans for moving to Napa.

The lodge elected Mrs. Ethel Van Vleck as her successor by acclamation, and Mrs. Van Vleck will be installed in that office at the time of the regular installation of officers on February 7th.

Two visitors were in attendance at the meeting, Jessie M. Watts, of Shasta Lodge, at Redding, and Idella Nose, of Portola Lodge, at Portola.

Following the meeting, a social occasion remembered the January birthdays of members and those who were honored include Mrs. Florence Clark, Emma Pierroz, Mary Rasmussen, Lula Weymouth, Katherine Besse, Edith Van Ness, and Jules Besse. Dutch whist was enjoyed after which refreshments were served.

Rev. J. R. Rudkin, pastor of the Federated Church, left Tuesday for Sacramento to spend several days attending the annual meeting of the Presbytery, at the Westminster Church.

NAZIS IN RETREAT GET LITTLE PITY, SAYS SOVIET REPORTER

MALOYAROSLAVETS, Russia (UP)—The Axis troops now fleeing back over their frozen tracks in response to Hitler's "inner call" have burnt pity and leniency out of the hearts of the Soviet people and placed there an implacable hatred.

The reason may be found in such things as a little blue road sign which reads: "Village of Pokrovskoye." There is no such village now. The Germans burned it to the ground.

In a trip 80 kilometers (about 50 miles) westward there were many such places—villages of chimneys—in which the only houses remaining were those built for birds. When they had no time to burn everything, the Germans made a selection—as in Maloyaroslavets, where they picked for destruction two schools, a children's nursery and the city library, with all its books.

Some villages remained unscathed because the Germans were swept off their feet by the sudden onslaught of the Red army.

In one case, that of the village of Lukino, the Red army was nowhere in sight. The wit of Russian farmers saved their homes. The farmers gathered in a crowd and began to shout: "Our soldiers are coming! Ours! Ours! The Germans look to their heels."

Not so long ago the Germans still were marching eastward along this road. They got as far as the Nara, a small river. On Dec. 1 our offensive began at this sector of the front. We advanced in one direction 100 kilometers (about 62 miles), twice as fast as the Germans had in November and December. Our losses are much lighter than those of the Germans.

Everywhere there is the hatred of the people for the Germans, even among the old folks, some of whom three months ago still were lukewarm in their dislike for the Nazis.

I found the door of one house intact but left wide open, though the cold had become more intense. An old woman was inside.

"Granny," I asked her, "why don't you shut the door?"

"I am airing the room to get rid of their stench," she replied.

A farm woman, with a stern face the like of which you may see on old icons, tells me: "The young ones (German soldiers) stayed at my house. When they were sent to the front they were afraid. One of them was crying. Before leaving he begged me, 'Dear little Mother, pray for me' and he pointed to the image of Christ. I certainly did pray. I told him, 'I hope they kill you, you scoundrel!'"

If you wonder why there should be such hatred you may talk to an old woman standing beside a grave in the village of Zamytskoye. There is buried her 16-year-old daughter, Claudir Ortazheikina, who had resisted the Germans.

To speed construction on new buildings at the Naval Academy, five quarries supply the needed granite.

Alluringly Feminine

Dusty pink night gown.

By VERA WINSTON

A DUSTY pink silk crepe nightgown loses none of its feminine charm because of its sleeves. The bodice is fitted with a rather high waistline in front and a more normal waistline in back. It features classic revers and two high-placed slit pockets and is trimmed with dark red cross stitching. The skirt has a slight flare in back.

WOMEN'S ARMY CORPS IS RECOMMENDED BY WAR DEPARTMENT

WASHINGTON, (UP)—The army will recruit an initial force of 12,200 volunteers to form a women's army auxiliary corps if enabling legislation recommended by the war department is approved, Lieut. Col. Ira Swift, of the army's general staff, told the house military affairs committee today.

Swift estimated it would cost \$10,000,000 to get the program underway.

About 6,000 civilian women workers are now working in air raid information posts but there is a need for "military control," he said. Defects of the existing system, he said, are absences of the unpaid workers and the great turnover in personnel.

WHAT YOU SHOULD KNOW ABOUT

fuel OIL

• Cleaner
• No Waste

• Economical
• Convenient

Once you've known the conveniences of fuel oil you'll never want to switch to any other method of heating your home! You regulate the temperature from your easy chair—no coal to shovel, no ashes to take out. It's cleaner—keeps curtains and walls fresher. There is no waste coal dust on the basement floor; every bit of oil is utilized. And it's economical. You owe it to yourself to investigate!
